

Literature Organizing System for Conde Nast

Working from Mancini Duffy's specifications, Datamation developed a modular system of sorting shelves and cabinetry for 17 Conde Nast magazines moving into the new Conde Nast building in Times Square. Each magazine required dimensional variations to precisely fit specific spaces, ranging in width from 4' x 6" to more than 25'. Critical move-in schedules with limited building access demanded exacting installation schedules.

CAD drawings for each of the 17 different modular configurations insured precise detailing and fit for a "built-in" look.

The finished installation provides 1" incremental adjustability of sorting shelves. Cabinets above and below the sorting area offer bulk storage.
