

Datamation prepares detailed, dimensioned drawings of all proposed mail and copy center designs for review and approval by architect and client.

The compact mail center maximizes sorting and storage capacity with under-counter and wall-hung cabinets.

Copy room cabinets proved easily accessible storage for paper and binding supplies; a continuous work counter for collating also supports multiple binding machines.

The mail and copy centers for Sandler O'Neill incorporate space-saving efficiency with economical storage solutions. Designed by the SCR Design Organization, the project was built and installed by Datamation Systems on an accelerated schedule to meet the client's critical move-in date.
