

Worklands Promote Productivity

Datamation's *Worklands* are task-specific solutions that facilitate the work areas with multi-sided access and space saving storage capabilities. Custom designed from standard modular components to meet a client's functional and space requirements, *Worklands* offer a wide range of storage options and finishes that include laminates and fine wood veneers.

Cubby storage provides space for rolled documents. Overhead cabinets, accessible from 2 sides, feature built-in task lights to illuminate drawing details.

Built-in flat file storage at the ends of this *Workland* supports an oversized work-surface and raised file organizing platform.

A built-in light box is accessible from 2 sides, maximizing space utilization with enclosed cabinet storage.
